

Sept. 11, 2008 | **World Molecular Imaging Conference** | Nice, France  
Symposium will be from 17:10 - 18:40

## Developing Imaging Radiopharmaceuticals for the Future

This workshop is intended to discuss and highlight some of the most interesting opportunities and niches for new tracer development, discuss the practicalities of assessing the potentials of these novel compounds, and provide feedback on the initiation and startup of a trial whose endpoint is regulatory approval.

TOPICS |

### **Molecular Imaging: The Role of Radiometal Labeled Tracers for PET and SPECT**

Shankar Vallabhajosula, PhD NY Presbyterian Cornell Medical Center

### **Ideal Profiles for Imaging Drugs to Bring to Market, a Perspective From Industry**

Richard Zimmermann, PhD, IBA Molecular

### **Running a Pivotal Phase 3 Trial, Experiences From the Start of the First PET Antibody Imaging Trial (Willex G-250)**

Norman Neville, MD Willex AG
